Education

VIT Bhopal University | Integrated M.tech in Artificial Intelligence

August 2023 – Present

Sri Sathya Sai Vidhya Vihas | Higher Secondary School

2021 – 2023

Experience

Freelance Web Design | Witwaves co.

October 2024 – March 2025

- **Technologies:** Figma, UI/UX
- Led the **initial project planning phase**, conducting in-depth **user research and competitive analysis** to identify user needs and product direction.
- Designed a **high-fidelity, visually engaging user interface** for the entire application, ensuring consistency and usability across all screens.
- Developed **interactive prototypes in Figma**, enabling efficient stakeholder feedback and iterative design improvements.
- Applied **UI/UX best practices** to enhance user experience, accessibility, and visual hierarchy.
- Collaborated with stakeholders to **translate business requirements into intuitive design solutions**.

Projects

Memory Map

January 2026 – Present

- Developing a **full-stack application** to enable users to pin and organize trip memories with **dates, durations, and photo uploads**.
- Designed and implemented a **map-centric user interface in React**, allowing intuitive visualization and interaction with location-based memories.
- Built a **scalable RESTful API using Node.js and Express**, ensuring efficient data handling and seamless frontend-backend integration.
- Integrating a **production-ready PostgreSQL database** using Drizzle ORM for type-safe queries and optimized performance.
- Implementing **data validation and schema enforcement using Zod** to ensure robust and reliable backend operations.
- Utilizing **Docker for containerization**, enabling consistent development and deployment environments.
- Designed UI/UX flows and interactive prototypes in **Figma**, focusing on usability and clean visual hierarchy.

Achievements

Hackbyte 3.0 | Winner Wikimedia Sponsor Track

April 2025

- Secured **2nd place** among competing teams by building a solution aligned with **Wikimedia guidelines**.
- Designed and implemented the **entire user interface**, focusing on usability and clarity of content evaluation.
- Integrated the **Gemini API** to develop a Wikipedia article evaluator, enabling users to assess content against Wikimedia standards.
- Contributed to backend development by implementing **authentication and user management systems**.

UI/UX Hackathon | Winner UI/UX Hackathon

Feb 2025

- Achieved **1st place** by designing **UniMarket**, a hyperlocal marketplace connecting students, local vendors, and campus clubs
- Independently developed a **high-fidelity interactive prototype**, covering complete user flows and responsive layouts
- Successfully completed additional **bonus challenges**, demonstrating strong problem-solving and design efficiency
- Delivered a **user-centric design solution** with a focus on accessibility, usability, and real-world applicability

Technical Skills

Languages: JavaScript, Python, HTML, CSS

Frontend: React.js, Redux, Tailwind CSS, SASS

Backend: Node.js, Express.js

Database: MongoDB, PostgreSQL, MySQL

Libraries & Tools: Drizzle ORM, Zod

Design & UI/UX: Figma, UI/UX Design

Developer Tools: Git, Github
